A-10 Widebody

Description

The A-10 Widebody is the ultimate new design from Autoform in our mission to not only preserve, but, also continue the legacy of the Viper. Drawing from the the racing history of Autoform and the Viper along with a modern design for the baddest street machine around.

NEW AUTOFORM PANELS INCLUDED ON A-10 BUILD:

- Front Fascia with LED Driving Lights

- L/R Front Fender

- Autoform Stryker Hood

- L/R Sidepipe Cover

- L/R Rear Quarter Panel

- L/R Inner Wheel Well Extension

- Coupe Style Deck Spoiler (Convertible Only)

- L/R Taillight Filler (convertible Only)

- Speedster Bubble (Convertible Option)

All stock panels are removed at Autoform; New A-10 panels are handcrafted and then fitted to ensure correct panel gap and fit according to OEM build tolerances before paint at Autoform

All A-10 panels are block sanded and sealed before base and clear coat application. After paint, panels are water sanded and buffed using the same process as specified by the OEM.

REQUIRED/ADD-ON BUILD ELEMENTS:

Each new build will require either new or reconditioned OEM Gen V style wheels with spacers - Or, Autoform's wheel partner, Forgeline, will work with us to build a perfect wheel to match your taste and style.

All A-10s require purchase of adjustable coil-overs to give the car the correct stance and handling. Both BC Performance and MCS coil-overs are offered for different price and performance standards. All coil-overs are installed at Autoform and a basic street alignment is included in the installation cost; 4 wheel race alignment is offered as an added option for track use.

As part of our 'Group C' Custom Build group. Prefix Performance has offered their Viper V-10 engine upgrades to add to the performance of the A-10s. Engines will be removed prior to panel work at Autoform.

Custom interiors are also available through Venzano Automotive, the long-time leader in custom Viper interiors

Additional Autoform aero pieces can also be added to each build

We will work with each customer to design each A-10 to match their specific taste and budget, because of the intended custom nature of each build, pricing will be based upon the options chosen for each A-10.

Here are the 'Build Groups' based upon paint options that customers can use as a starting point in configuring their own A-10 Widebody

BUILD GROUP A:

- All A-10 panels mounted and fitted to original OEM build tolerances.
- Panels painted to match original car color
- *Starting at \$28,000 (Coupe) / \$28,000 (Convertible)*

BUILD GROUP B:

- All A-10 panels mounted & fitted to original OEM build tolerances
- Complete color change of any OEM Viper color
- *Starting at \$33,000 (Coupe) / \$35,000 (Convertible)*

BUILD GROUP C:

- All A-10 panels mounted & fitted to original OEM build tolerances
- Complete custom car color change - From Autoform or Prefix Coatings
- *Custom Price based on options chosen*

OPTIONS FROM AUTOFORM PARTNERS:

- New or refurbished OEM Gen V wheels & spacers are required - Custom wheel options through our partner Forgeline are also available.
- Coil-Overs are required for correct stance/handling - Options available from BC Performance and MCS
- Performance upgrades through Prefix Performance
- Custom interior options are available from Venzano Automotive
- Additional Autoform aero pieces can also be added to each build
